Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2141

1. Claims 1-24 and 26-38 are presented for examination.
2. New corrected drawings are required in this application because applicant does not provide suitable descriptive legends. Applicant is required to provide suitable descriptive legends for understanding of the drawing in addition to reference numbers. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-24 and 26-38 are rejected under 35 U.S.C. § 102(e) as being anticipated by Kanefsky et al. (Kanefsky) Pub. No. 2002/0026500.

5. As to claim 1, Kanefsky teaches the invention as claimed, including a method of sending common information to multiple destination sources using a handheld computer (figure 1), the method comprising:

- selecting information in a source file (page 3 para. [0030-0033]);

- storing the selected information in memory (page 3 para. [0030-0033]);

- selecting a first remote destination (page 3 para. [0036-0038]);

- adding a first destination-specific information to the selected information (page 3 para. [0036-0038]);

- sending the selected and the first destination-specific information to the remote destination in a single message (page 4 para. [0040]);

- selecting a second remote destination (page 3 para. [0036-0038]);

- adding a second destination-specific information to the selected information (page 3 para. [0036-0038]);

sending the selected and the second destination-specific information to the second remote destination in a single message (page 4 para. [0040]).

6. As to claim 2, Kanefsky teaches creating a customizable file and automatically moving the selected information from the memory to the customizable file (page 3 para. [0039]).

7. As to claims 3-5, Kanefsky teaches the source file is an electronic mail message created by the user; the source file is a template and the selecting information step is performed automatically; the selected information is electronic text (page 6 para. [0071-0075]).

8. As to claims 6-7, Kanefsky teaches the selected information is an electronic file attachment, and the electronic file attachment is at least one of an audio file, a video file, a spreadsheet file, a database file, a presentation file, and a text document file (page 6 para. [0074 – 0077]).

9. As to claims 8-9, Kanefsky teaches selecting a remote destination includes entering a destination address; and wherein selecting a destination further comprises selecting the destination in response to a user prompt, wherein the user prompt automatically appears after the source file is created (page 5 para. [0058]).

Art Unit: 2141

10. As to claims 10-11, Kanefsky teaches selecting a destination comprises creating a group of destination addresses having a group name and selecting the group name; wherein selecting a destination further comprises selecting the destination in response to a user prompt, wherein the user prompt automatically appears after the source file is created (page 5 para. [0058]).

11. Claims 12-24 and 26-38 have similar limitations as claims 1-11; therefore, they are rejected under the same rationale.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le H. Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 7:00am - 4:30pm.

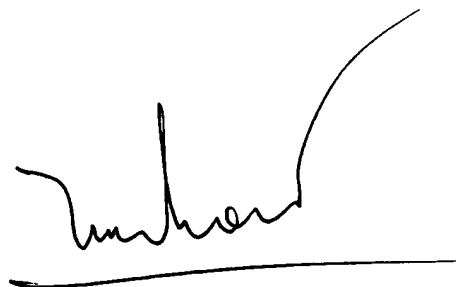

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
